

# Healthcare Supply Chain Management Solutions

## Optimize Supply Chain Savings and Efficiencies

Pandemic disruptions, labor shortages, and inflation have caused many healthcare systems to operate with negative margins. In an effort to reduce waste in spending and processes, these systems are looking to leverage technology and optimize practices to manage expenses and reduce costs.

However, these organizations face several barriers, including decentralized practices, unmanaged spend (especially in non-clinical categories), and a lack of supply chain data governance.

CitiusTech supports provider organizations seeking to reduce cost variances and risk across their supply chain. Together, we evaluate and manage new cost categories, strategizing to control costs and unlock new savings. We enable more efficient workflows and processes that proactively address or avoid increased costs.

Our Supply Chain Health Check evaluates a client's overall operating model, uncovering savings opportunities and workforce efficiencies to explore. Additionally, our Supply Data Analytics provides clients with the tools they need to effectively address spend savings, highlighting even more categories to investigate. Lastly, our Technology Automation reduces manual tasks, streamlining workflows and freeing associates to focus on high-value tasks.

## Key Offerings

### Supply Chain Health Check

Uncover enterprise-wide opportunities within:

- ▶ Category Management
- ▶ Supply Standardization
- ▶ Process Maturity Ratings
- ▶ Data Management
- ▶ Operating Models

### Supply Data Analytics

Develop reporting and data capabilities that optimize current systems while uncovering technology gaps to prioritize for future development.

### Technology Automation

Automate processes across the supply chain to create efficiencies and reduce manual tasks. From tracking and managing capital equipment to establishing data entry RPAs, automation can greatly enhance process flows.

**CitiusTech: Supply Chain Operating Model**

## Customer Value

- Identify standardization opportunities
- Reduce time between analytics and decision-making
- Optimize inventory utilization and replenishment
- Improve three-way matching resolutions
- Reduce operational costs associated with manual item, ordering and payment processes
- Use forecasting to reduce stock-outs and supply delays

## About CitiusTech

With 8,000+ healthcare technology professionals worldwide, CitiusTech helps leading healthcare and life sciences organizations reinvent themselves by accelerating digital innovation, leveraging next-gen technologies and driving data convergence across the healthcare ecosystem. We provide strategic consulting, digital engineering, data, analytics & AI, specialized platforms and end-to-end solutions to over 130 organizations across the payer, provider, medtech and life sciences industries. Our key focus areas include healthcare interoperability data management, quality performance analytics, value-based care, omni channel member experience, connected health, virtual care delivery, real-world data solutions, clinical development, personalized medicine and population health management.

Our cutting-edge technology expertise, deep healthcare domain expertise and a strong focus on digital transformation enables healthcare and life sciences organizations to deliver better outcomes, accelerate growth, drive efficiencies, and ultimately make a meaningful impact to patients.
